<sup>1</sup> Please ensure that all patients receive a copy of *Important Information for Augmentation Patients about Mentor MemoryGel® Silicone Gel-Filled Breast Implants* or *Important Information for Reconstruction Patients about Mentor MemoryGel® Silicone Gel-Filled Breast Implants*. These educational brochures provide patients with information regarding the risks and benefits of breast implants. It is very important that your patient reads and fully understands the relevant brochure and has an opportunity to consult with you prior to deciding on surgery. Your patient should be advised to wait one to two weeks before scheduling surgery. For current contraindications, warnings, precautions, risks and complications for MemoryGel® silicone gel breast implants, please refer to the Product Insert Data Sheet provided with each implant, or online at <http://www.mentorcorp.com/MemoryGel-PIDS>.

# Contour Profile® Tissue Expanders

- Utilizes BufferZone®, an exclusive self-sealing technology to mitigate deflation
- Greater lower pole projection
- Siltex® textured surface
- Provided sterile; single use only

## CPX2™, Siltex® Contour Profile® Breast Tissue Expanders

Contour Profile Expanders (CPX) provide advanced ergonomic features in the shapes most often desired for optimal results. The combination of the BufferZone® and the Dacron®<sup>2</sup> patch creates a controlled formation of an anatomically shaped pocket. Innovative features in the family of CPX products give you the confidence of security and ease of use.

# Contour Profile® Tissue Expanders

- Three tabs are provided at the 3, 6, and 9 o'clock
- A suturing hole is provided on each tab for ease of use
- CPX3™ is offered in the same styles, dimensions and volumes as our standard CPX2™ product family
- Provided sterile; single use only

## CPX3™, Siltex® Contour Profile® Breast Tissue Expanders with suturing tabs

CPX3™ breast tissue expanders offer the same great features as our original Contour Profile® tissue expanders, but with the added convenience of suture tabs for enhanced stability.

### Siltex® Low Height , Style 7100

Catalog #	Vol.	Width	Height	Proj.
354-7111	250 cc	11.4 cm	8.1 cm	6.1 cm
354-7112	350 cc	12.7 cm	9.4 cm	6.5 cm

ACELLULAR HYDRATED DERMIS

- Derived from donated human allograft skin
- No rehydration - ready to use right out of package
- No refrigeration needed
- Exceptional handling and feel - consistent thickness
- Provided sterile; single use only

## *FlexHD® Dermis for Breast Reconstruction*

Through an alliance with MTF, the world's largest tissue bank, Mentor® is proud to bring you FlexHD®. This acellular dermal matrix is derived from donated human allograft skin. Prehydrated and with no refrigeration necessary, FlexHD® is ready to use when you need it.

### **How To Place an Order for FlexHD®**

**Contact:** MTF Customer Service Staff

**Hours:** Mon – Fri, 8:15 am – 7:30 pm (EST)

**Telephone:** 800-433-6576

**Fax:** 732-661-2298

Tissue will be shipped next day by FedEx® at customer's expense.

### **How To Return an Order of FlexHD® or Report A Customer Complaint**

**Contact:** MTF Customer Service Advocates

**Telephone:** 800-946-9008 x 2307

**Hours:** Mon – Fri, 8:15 am – 5:30 pm (EST)

- All returns must be accompanied by a Return Authorization Number (RA#).

- RA#'s can be obtained by contacting MTF's Customer Service Advocates.

- The twelve digit serial number on the tissue packaging must be provided to obtain a RA#.

- Return requests must be made within 30 days of the original invoice date.

- Subject to a restocking charge of 20% of the service fee of the tissue.

- Freight charges will not be credited.

- All tissue returned must have at least 1 year shelf life remaining.

- Tissue must be shipped back to MTF.

- **UPS Shipments are not permitted.**

AFTER

F A C E

#### *Important Safety Information.*

In the U.S. PREVELLE® Silk is indicated for injection into the mid to deep dermis for correction of moderate to severe facial wrinkles and folds (such as nasolabial folds) and is well tolerated. Common side effects reported in PREVELLE® Silk clinical studies, included temporary injection site reactions, such as redness and swelling, and were usually mild in nature not requiring medical intervention. PREVELLE® Silk contains lidocaine and must not be used in patients with known lidocaine hypersensitivity.

Please see full prescribing information at [www.prevelle.com](http://www.prevelle.com) or call Mentor at 1-800-235-5731.

A close-up photograph of a woman's back and shoulder area. She is applying a white lotion or cream onto her skin with her right hand. The lighting is bright, creating a strong glow around the lotion bottle and her skin. The background is plain white.

### Aspiration Systems and Accessories - PSI-TEC III™

## PSI-TEC III™

#### Catalog # Description

##### PSI-TEC III™ Aspirator

The ultra-quiet PSI-TEC III™ Aspirator offers the most powerful and responsive vacuum among our collection.

PT-ASP-III-110      PSI-TEC III™ Aspirator (Includes Aspirator, I.V. Pole and Bar System with Bag Hangers, Dual Canister Holder, (2) Reusable Canisters, (5) PSI-TEC™ Total Aspiration Kits, Power Cord, Foot Pedal)

##### Accelerator II™ Aspirator

The classic design of the Accelerator II™ Aspirator allows for convenient placement and storage, while offering quiet vibration free performance during demanding procedures.

ASP II	Accelerator™ II Aspirator (110 Volt)
PT-III-RAIL	PSI-TEC III™ Rail
PT-III-SHELF	PSI-TEC III™ Tray for IV Pole with Clamp
PT-III-CLIP	PSI-TEC III™ Clip for Rail (Canister Bracket)
CN2000-FT	Reusable 2000cc Canister
SCREW-FT	Hollow Screw & Washer for CN2000-FT
CN-FLEX-T	Flexible "T" Fitting with 3/8" Tubing Connectors
CN-MOUNT	Mounting Bracket for Accumeasure Canister
AB43426	Wire Basket for IP™ Canister
AB43429	PSI-TEC III™ Dual Canister Basket Holder

Cannula options range from a standard one-piece style to two piece configurations like the Toomey Syringe System or the ARC™ System for traditional or power assisted suction.

## Cannula Products - Cannula Style Descriptions

The various tip designs are available in different lengths, diameters and handle sizes to accommodate a broad range of surgical sites and reduce surgeon fatigue.

### Accelerator III™

Three openings in a triangular pattern. Our most popular tip design.

### Accelerator "Touch-Up"™

Similar to the Accelerator III™, the Touch-Up™ features two openings at the distal tip as shown.

### Becker™

Riblike projections facilitate breakdown of tissue prior to aspiration, increasing speed and efficiency in a wide range of procedures.

### Becker Tear Drop™

Similar to the Becker, with proximally flared ribs, additional round openings.

### Candy Cane™

Features three elongated openings in a spiral as shown.

### Fournier

Three openings in a linear pattern.

### Gilliland Etching Cannula

Four openings in a linear pattern. Distal end of each opening is raised for etching of subcutaneous tissue.

### Keel Cobra™

V-shaped design allows easy penetration and unprecedented efficiency and control. Two side openings near the tip and a single hole positioned above.

### Keel Cobra II™

Grooved laterally for improved guidance and tissue ingress, the Keel Cobra II features side openings near the tip and a third proximal opening.

### Las Vegas™

Similar to the Accelerator III, the Las Vegas employs a single distal opening with two proximal openings. Less aggressive at the tip. Ideal for feathering.

### Mercedes

Featuring three openings in a circumferential pattern near the distal tip of the shaft.

### Mladick™

The Mladick™ Convex Cannula are designed for longitudinal work while our Mladick™ Concave Cannula are designed for circumferential liposuction.

### Sattler™

24 small openings surrounding distal tip.

### Spatula

So named because of its flattened profile, the spatula cannula is ideal for cervical and facial procedures.

### Standard

The cannula that started it all. One opening near the tip.

## Cannula Products - One-Piece Cannula (reusable)

Precision engineered surgical stainless steel cannula tips are coupled with anodized aluminum handles available in 1"(L) and 3/4"(S) diameters

## *Important Safety Information*

MemoryGel® and Saline-filled breast implants are indicated for breast augmentation in women (at least 22 years old for MemoryGel® and 18 years old for Saline) or for breast reconstruction. Breast implant surgery should not be performed in women with active infection anywhere in their body with existing cancer or pre-cancer of their breast who have not received adequate treatment for those conditions or are pregnant or nursing.

Breast implants are not lifetime devices and breast implantation is not necessarily a one-time surgery. The most common complications with the MemoryGel® breast implants include reoperation, capsular contracture, asymmetry and breast pain. A lower risk of complication is rupture. The health consequences of a ruptured silicone gel-filled breast implant have not been fully established. MRI screenings are recommended three years after initial implant surgery and then every two years after to detect silent rupture.

The most common complications with Saline-filled breast implants include reoperation, implant removal, capsular contracture, wrinkling, breast pain and deflation.

Patients should receive a copy of *Important Information for Augmentation Patients about Mentor MemoryGel® Silicone Gel-Filled Breast Implants* or *Important Information for Reconstruction Patients about Mentor MemoryGel® Silicone Gel-Filled Breast Implants* or *Saline-Filled Breast Implants, Making an Informed Decision*. Your patient needs to read and understand the information regarding the risks and benefits of breast implants, with an opportunity to consult with you prior to deciding on surgery.

Contour Profile® Tissue Expanders are used for breast reconstruction following mastectomy. This expander is intended for temporary subcutaneous or submuscular implantation and is not intended for use beyond six months. Do not use the Contour Profile® Tissue Expander in patients where an MRI may be needed. The device could be moved by the MRI causing pain or displacement, potentially resulting in a revision surgery. The incidence of extrusion of the expander has been shown to increase when the expander has been placed in injured areas.

For detailed indications, contraindications, warning and precautions associated with the use of all Mentor implantable devices, which include Saline-filled breast implants, MemoryGel® breast implants and Tissue Expanders, please refer to the Product Insert Data Sheet provided with each product, or online at [www.mentorcorp.com](http://www.mentorcorp.com).

*Mentor - 35 years of innovation, and success.*

Mentor is dedicated to manufacturing, developing and marketing innovative, science-based products for the aesthetics specialties fields. And, most importantly, we are committed to providing physicians with the tools to help patients transform their lives.

*Superior manufacturing, research, and testing.*

Mentor has followed the highest standards of safety in manufacturing, testing, and clinical trials for saline and MemoryGel® (silicone gel) breast implants for use in breast enlargement and reconstruction. We have worked closely with surgeons throughout the world to develop innovative products such as Spectrum® postoperatively adjustable breast implants and our Contour Profile® Tissue Expanders.

Mentor's manufacturing capability is exceptional. We have substantial experience in biomaterials and biopolymers manufacturing. At the same time, our regulatory expertise has enabled Mentor to bring products to market in the world's most stringently regulated health care environments.

For the newest product and service innovations, look to the company that will bring them to you — Mentor.
